However the app is very garbage. I've been in many competitions where the app won't show contests in my live or upcoming. When they show up they don't let you click in the game to see if you're winning or losing your bets. So recently I've been using the website on my laptop which is just more of a pain then Hope this app will be fixed and done better overtime. Hi, were you able to resolve any issues? There are many updates since our app Fix your concerns. Please contact support@monkeyknifebattle.com and our team can help you. First of all the app is awesome and unusable. The second I entered a second-half contest for tonight's NFL game and when I presented my options I received a message saying that I couldn't choose less for all my options so obviously I made a choice to make and select more on something I didn't want. After the game finally ended to think what happened.. I They were all short! So how could you possibly win over this app when they don't even give you a chance? Also when I went to email support obviously they didn't have an answer and told me they couldn't return the account to me so I felt like I was robbed. I don't recommend this app or website to my worst enemy just horrible 🤬🤬🤬 for example, the app refused to submit me a login. I started using the browser because of it. Fields auto fill when using password manager but refuse to trigger the submit button. Bets don't always appear in the dashboard under any tabs. Also design aesthetics are disgusting. But the most potent problem here is IMO No 2FA and there is no easy way to delete your account. For a gambling app, these should be absolutely essential. Hi, were you able to resolve any issues?
